

#### Nurturing Nature, One Husk at a Time

The world is facing an environmental crisis. Air pollution, water degradation, and soil erosion are on the rise due to unsustainable human activities. At **SDR Innovations**, in collaboration with **AV Coirs**, we are committed to creating sustainable solutions that restore the ecological balance and protect our planet for future generations.

Our unit, based in Coimbatore, Tamil Nadu, specializes in producing high-quality cocopeat (coir pith)—a renewable by-product of coconut husk. Cocopeat is widely used as a soil conditioner and growing medium in landscaping, horticulture, floriculture, and home gardening. It is 100% biodegradable and environmentally safe, making it an ideal choice for green living.

With advanced manufacturing units spread across Tamil Nadu, we ensure complete control over raw materials and production, enabling us to deliver consistent quality and timely shipments. Our strong global footprint includes exports to the Netherlands, USA, China, South Korea, UAE, Singapore, Malaysia, and Sri Lanka.

Since our inception in 1998, we've continued to innovate through extensive R&D, developing value-added eco-products. Our journey is far from over, and we remain driven by our vision of building a healthier and greener tomorrow.
